

HEALTH CARE FUNDING GUIDE

Your Health Care FSA

A flexible spending account for health and medical expenses

The easy way to save for your health and medical expenses

Even the healthiest families have medical expenses each year — like copays, prescriptions, new glasses and dental costs. A Flexible Spending Account (FSA) is perfect for setting aside money to pay for those costs when they come around.

What's an FSA?

An FSA lets you set aside money to pay for health care expenses. It can help you save money because you fund it with pre-tax dollars.

With a Health Care FSA, you can:

- › Take pre-tax dollars from your pay check to fund your FSA.
- › Reduce your taxable income and save on taxes.
- › Have money on hand for your health and medical needs.

What you should know about a health care FSA

What can you use it for?

You'll want to be careful to only use your FSA money on health care expenses like:

- › Deductibles
- › Copays
- › Coinsurance
- › Dental and vision care
- › Glasses, contact lenses, braces and hearing aids
- › Prescription drugs
- › Over-the-counter medications

How much to set aside

To help you guess what you'll use, start by reviewing your health care expenses (including dental and vision costs) for the past two years.

Use your Personal Health Statements from your account at **bcbst.com**. They give you full details of all your health care claims and expenses, including dental and vision, for the past two years.

Making changes

You can change your contribution amount only if you have a big life event or family status change, such as a:

- › Marriage
- › Divorce
- › Birth
- › Adoption
- › Job change

Be sure to use your funds each year.

Only set aside as much money as you'll spend on health expenses for one year. While the IRS allows you to contribute up to \$3,050 in 2023 and \$3,200 in 2024, health care FSA funds don't carry over to the next year unless your employer has told you differently.

How health care FSAs work

Funding Your FSA

- 1 Decide how much money you want to put in the FSA (up \$3,050 in 2023 and \$3,200 in 2024).
- 2 Ask your employer to withhold a portion of that amount each pay period, which will go into your FSA before taxes.
- 3 Use your FSA funds throughout the year to pay for qualified health care expenses.
- 4 Remember, your FSA funds don't carry over from year to year, so make sure you spend all of your money by the end of the year.

Using your FSA

- 1 Visit a provider in your network.
- 2 Pay the provider for your care.
- 3 The provider will submit a claim to us.
- 4 We'll automatically reimburse you from your FSA. If you want more control over your FSA, you can manually file claims for only the expenses you want the FSA to cover.

You can easily check your claims and FSA balance anytime by logging in to **bcbst.com**.

Here's an example of how you save with an FSA

John estimates that his family will spend at least \$3,200 for copays, deductibles, out-of-pocket drug costs, eyeglasses and braces for his daughter. Funding an FSA will help him pay for care with pre-tax dollars.

How John Saves

	With an FSA (pre-tax dollars)	Without an FSA (after-tax dollars)
Annual Earnings	\$ 30,000	\$ 30,000
Pre-Tax Contribution	\$ 3,200	
Taxable Income	\$ 26,800	\$ 30,000
Taxes*	\$ 6,700	\$ 7,500
Take-Home Pay	\$ 20,100	\$ 22,500
Health Care Costs		\$ 3,200
Spendable Income	\$ 20,100	\$ 19,300
John's Savings	\$ 800	

*Based on a 25% tax rate (includes federal, state and Social Security/FICA)

John's expenses are the same with or without an FSA, but by funding a health care FSA with pre-tax dollars, he saves **\$800**.
